EDUCATION

DARTMOUTH COLLEGE

Master of Engineering Management

Coursework: Pricing Strategy, International Strategy, Marketing, Machine Learning

Extra Curricular: Graduate Representative at Student Council

United States
Graduating: November 2026

MOTILAL NEHRU NATIONAL INSTITUTE OF TECHNOLOGY ALLAHABAD

Bachelor of Technology in Electronics and Communications Engineering

Awarded Full Scholarship for Undergraduate Study by the Government of India

Coursework: Data Structures and Algorithms, Microprocessor, Digital Electronics

Extra Curriculars: Co-President at Media House MNNIT, Mentor at Student Mentorship Program

India
Graduated: May 2021

PROFESSIONAL EXPERIENCE

Product Manager - AI Strategy

Care Health Insurance Ltd

April 2023 - August 2025
India

- Architected and executed the strategic roadmap for AI portfolio of 6 products, managing 3 PMs and partnering across 13 teams to align C-suite on long-term OKRs across fraud, document intelligence, medical data, KYC and CRM
- Built a 0 to 1 claims automation platform, leading problem discovery, model selection, and production rollout, then scaled to 1M+ cases, reduced latency 20%, and generated \$1.1M+ in savings (Best Innovation Award, AWS AI Impact 2026)
- Analyzed customer insights and developed prototype for grievance summarization, using Claude API, Python, and prompt engineering to reduce case resolution time by 45%, with planned integration to CRM, improving customer satisfaction
- Led organization-wide GenAI implementation in a highly regulated environment, implementing equitable and transparent AI practices, partnering with C-suite, engineering, and compliance teams for governance and responsible AI adoption

Associate Product Manager - Claims

Care Health Insurance Ltd

June 2021 - March 2023
India

- Conducted 40 customer interviews, analyzed 200+ support tickets, and performed competitive analysis to uncover core user pain points; partnered with design and marketing to redesign the mobile journey, increasing completion and engagement by 70%
- Reviewed claims payment processes with finance team, identified bottlenecks, and designed a new payment engine leading 3 engineers and 2 business analysts, cutting payout time from 2 days to 5 secs, enabling \$15M+ disbursements
- Conducted product discovery and authored PRD to ship an MVP for data extraction from health reports and integrated a prediction model with 2 engineers to proactively identify high-risk customers, reducing financial risk for the company
- Scaled the digital ecosystem by leading the integration of 96+ APIs across partner and hospital networks, reducing claims processing time by 75% and increasing digital engagement by 18%

PROJECTS

LinkedIn Content Generation Application

April 2026

- Developed a generative AI tool to create personalized LinkedIn content, optimizing for audience engagement and content relevance
- Designed prompt frameworks and content strategies to improve post quality, consistency, and user interaction
- Focused on enhancing user engagement through tailored content recommendations and iterative testing

AI-Powered Lead Generation Platform

March 2026

- Built an AI-driven lead generation application to identify and prioritize high-intent prospects using automated data from Exa APIs
- Designed end-to-end user workflows, enabling discovery of leads, auto drafting and sending e-mails, improving conversion potential

AI-First Learning Management System (LMS)

February 2026

- Authored PRD for user personas, system architecture, guardrails, and non-functional requirements, and prototyped using Antigravity
- Engineered an interface featuring audio interaction and voice/text queries, enabling real-time course access to enhance the student education experience, powered by a local LLM (Qwen3.5 via Ollama), pgvector for retrieval, and containerized microservices

SKILLS & CERTIFICATIONS

- **Product Management:** PRD | Product Roadmaps | Go-to-Market (GTM) | Platform Thinking | Customer Journey Mapping | Backlog Prioritization | A/B Testing | Success Metrics (OKRs, NPS, Engagement) | JIRA | Figma | Lovable
- **Technical:** AWS (Bedrock, ECS, Lambda, Textract, Sagemaker, SQS, SNS) | PostgreSQL | API Integration | Generative AI (GenAI) | OCR | Python | Docker | Google Antigravity | Model Evaluation | RAG
- **Certifications:** [Google GenAI Specialization](#) | [Microsoft AI Product Manager](#)
